**No tools, No glue**  
Convenient &  
Easy Installation

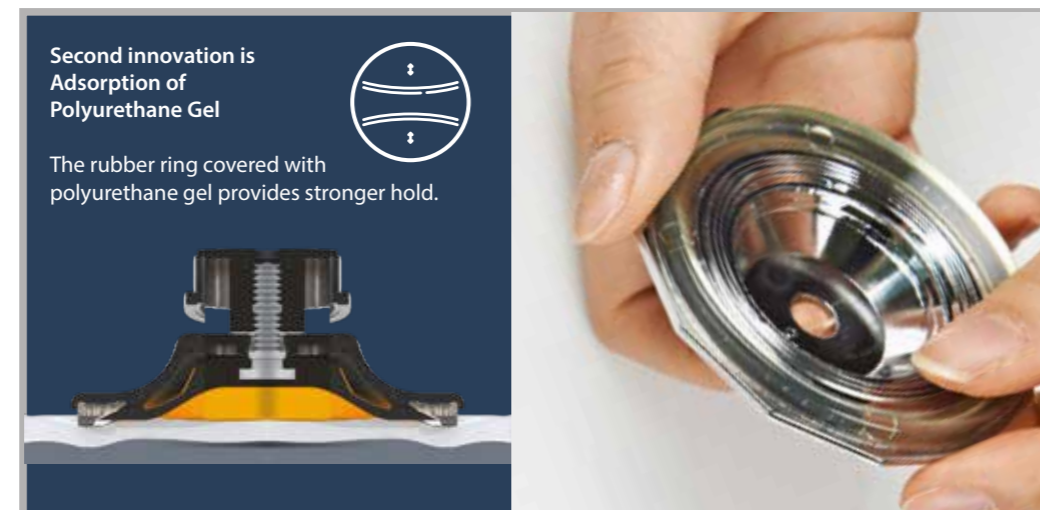

It is called Dual since the long-lasting hold is provided by the two main innovations of the product.

**What is Dual Vacuum Suction System?**

**1. Vacuum Suction of Rubber Cup**

The twist able cap through the screw increases the vacuum pressure in the suction cup. Thanks to this unique and patented method the product can hold up to 5kg.

**2. Adsorption of Polyurethane Gel**

**CandL**  
**Product details**

**Patented Dual Suction System** First dual vacuum system in the world made of durable material.

**Polyurethane Gel** Stronger hold thanks to the sorbent plate covered with polyurethane gel.

**Vacuum Suction** The twistable cap increases the vacuum pressure.

**Curved Surface** It can be attached even on a curved surface up to 1mm.

**Reusable** After washing, it can be easily reused.

**Economical** Readjusting the cap once a month makes it last longer.

**Up to 5KG** Can withstand up to 5kg of weight by a dual-vacuum adsorption system.

**Made in Korea** Our products are made in Korea with strict production regulations in order to produce high quality products.

**World-Wide Patented.**

**CandL®**  
- CandL Suction Cup -

Magnified wall surface

- ⊕ Polyurethane Gel attached under the suction plate. Even on a curved surface up to 1mm
- ⊕ Long lasting hold! The built-in screw increases the vacuum pressure. The cap needs to be readjusted once a month.

- Other Suction Cup -

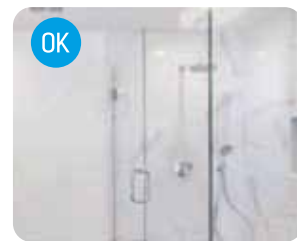

Magnified wall surface

- ⊗ When you zoom in on the wall, The surface is bumpy. Air enters between the wall and normal suction cups.
- ⊗ Even normal products can be attached heavy products, It is quickly dropped because the vacuum is released through air inflow.

## Check which surfaces can be use on

### Suitable surfaces | Non-porous surfaces

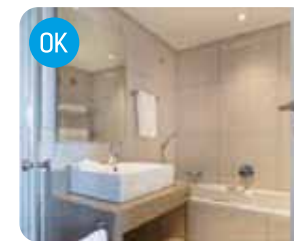

Tiles may have invisible air holes. If the suction cup does not adhere well, Test it by attaching the product to any non-porous surfaces such as mirrors or glasses to make sure it works properly.

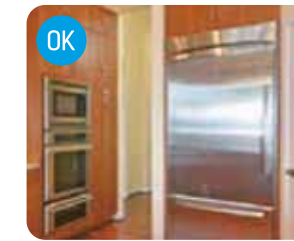

Glass

Mirror

Tile

Metal

### Unsuitable surfaces | Porous surfaces

Suction cup cannot be used on porous surfaces such as mosaic tiles, Matte tiles, water-based paint, wallpaper, marble, patterned tiles.

Wood

Brick

Marble

Wall Paper

Grout line

### How to wash CandL Suction cup?

1. Please unscrew a cap of suction cup.
2. Press the screw to separate a black rubber plate from a cover with polyurethane.
3. Remove dust use a neutral detergent and wash it in lukewarm water.
4. Dry thoroughly it with hair dryer or natural drying

### Recommendation:

Tighten the cap once a month for long lasting.
